

EnergyMate®

**Small in Size.
Big in Features.**

The EnergyMate is your simple and economical solution. It's size is ideal for almost any location and it can really deliver the power with a capacity of 120 amperes right where you need it. Just like it's big brother PowerPort, the EnergyMate is built to last, featuring extra durable, non-conductive polycarbonate UL

Approved housing. All this and the one-of-a-kind PowerSnap Panel. Now that's big!

The Power You Need | The EnergyMate's PowerSnap panel is available in combinations of up to 50 ampere corrosion-resistant receptacles. UL approved up to 120 amperes, choose from Marine, RV and International styles. Receptacles, breakers, high-speed internet and TV connections are securely tucked away in lockable cabinet panels.

Flexibility | Put your power where you need it. Mount the EnergyMate on a pole (bracket available), a stand, or create a utility center with our patented HydroLocker.

Lighting | Minimize your safety and security risks with the downward indirect lighting. Standard with energy efficient four watt self-ballasted fluorescent light, the lighting can be controlled remotely or by an onboard photo sensor.

Personalization | Customized logo option allows you to personalize each EnergyMate™ with your facilities' identity.

The Perfect Solution

HyPower® Utility Center

It's as easy as 1, 2, 3 . . .

- 1. Get a HydroLocker**
- 2. Custom configure your EnergyMate**
- 3. Attach the EnergyMate and add water if needed**

Just turn the power on and you are ready to go. You now have the strongest, best-looking dock locker on the market combined with the flexibility of HyPower's patented PowerSnap technology. Everything a boater would need all in one space saving solution.

Call or email today to see why HyPower is the best value for your marine solutions.

HydroLocker®

Space Saving Solutions

The most attractive dock locker on the market! A new, refreshing design from every angle that compliments today's yachts and marinas. Vandal resistant hinges with internal fittings for added security for storing your valuables. Designed to accept standard padlocks (padlock not included). Made of UV-stabilized polyethylene, the HydroLocker is corrosion and impact resistant.

As the industry leader, HyPower® is committed to providing revolutionary power products. By design, the patented HyPower products with PowerSnap® Technology saves you both time and money. It offers hundreds of panel combinations with the ability to change the panels instantly in a matter of seconds. Simple solutions for marinas, RV parks, home and recreation.

Our goal is to provide a power solution to fit your needs at the highest quality possible. Experience the simplicity at it's best with the latest technology of the HyPower Advantage.

THE POWER TO CHANGE. THE POWER YOU NEED.

PowerSnap®

Don't rewire when you need to upgrade. Just snap out the old and snap in the new. Your custom built and configured PowerSnap panel will save time and money.

As a dock builder we find that the flexibility of the HyPower PowerSnap technology makes it easier to work with our clients, finding them the right solution. With PowerSnap, the quality of their units and the level of service offered including on-time delivery, HyPower is the value choice for our customer's projects.
