

HYDROLOCKER®

Space Saving Solutions

The most attractive dock locker on the market! A new, refreshing design from every angle that compliments today's yachts and marinas. Vandal resistant hinges with internal fittings for added security for storing your valuables. Designed to accept standard padlocks (padlock not included). Made of UV-stabilized polyethylene, the HydroLocker is corrosion and impact resistant. Create a utility center by adding an EnergyMate in combination with your water connection.

Patented Under #D556,451

OPTIONS

FirePedestal®

The attractive yet simple FirePedestal offers quick response capabilities for your customers. This safety center provides easy access to a fire extinguisher and life preserver.

Extinguisher and life buoy not included.

LightCenter®

Our high-quality LightCenters illuminate your walking areas and are an aesthetically pleasing compliment to your overall appearance.

In areas where power is not required, the LightCenter provides an added element of safe pathway lighting.

FEATURES

PowerSnap®

Don't rewire when you need to upgrade. Just snap out the old and snap in the new. Your custom built and configured PowerSnap panel will save time and money.

Replacement Parts

Receptacles, breakers, light bulbs and more make HyPower your source for quality, industry proven replacement parts. We use standard parts and have them readily available to get your power back up with minimal effort.

Metering

Need to reduce your expenses by billing back actual utility dollars to the end user? Ask about electric and water meters to increase your revenue, adding value to the services you offer.

EMPOWER.

As the industry leader, **HyPower®** is committed to providing revolutionary power products. By design, the patented HyPower products with PowerSnap® Technology saves you both time and money. It offers hundreds of panel combinations with the ability to change the panels instantly in a matter of seconds. Simple solutions for marinas, RV parks, home and recreation.

Our goal is to provide a power solution to fit your needs at the highest quality possible. Experience the simplicity at it's best with the latest technology of the HyPower Advantage.

THE HYPOWER® ADVANTAGE

PowerSnap® Tested

What does PowerSnap tested mean to you? Quality control is a priority in our development and manufacturing process. Each unit is tested with power to provide our customers with the highest level of confidence in their power solution.

PowerSnap® Exchange Program

What if your needs change within the first 90 days of purchase? HyPower offers an industry exclusive exchange program. Standard built PowerSnap panels may be exchanged for the power needed to meet the needs of your marina or RV project.

UL Approved and ADA Compliant

Need to reduce liability and bring long-term value to every unit? HyPower assures your product meets industry standards to safety, security and ease of use for all customers.

THE HYPOWER® ADVANTAGE

THE POWER TO CHANGE. THE POWER YOU NEED.

Saving you time. Saving you money.

Staying true to our philosophy of keeping things simple and easy to use, everything is conveniently located for easy access on the PowerSnap panel, even with the power cords connected.

COMPONENTS

The PowerSnap panel connection is standard with thermal breakers located at the top of the panel for easy accessibility with tin-plated copper stab connections, wiring and snap-jaws. Our technology is proven to increase connectivity and provides corrosion resistance. Connections are rated for 200 amperes of continuous usage.

FLEXIBILITY

With over 200 combinations, HyPower has the solution to meet your needs. The PowerSnap panels, receptacles and breakers from 20 to 50 amperes with 100 amperes available plus connection options like cable TV, high speed internet and more. Flexible to manage too. Move the PowerSnap panel with the power you need, where you need it, no more adapters.

VALUE

Our snap-out, snap-in PowerSnap panel makes it even easier and safer to repair your breakers and receptacles. Repairing is as simple as taking it back to your workshop or to your favorite electrician. HyPower uses standard breakers and receptacles in all panels. No more ordering expensive custom replacement parts from a manufacturer and waiting for delivery.

DISASTER PREPAREDNESS.

Hurricane, Floods & Winterization

Protect your investment with optional PowerSnap Weather Base. Easy to lift. Easy to remove. Ready to use. With the optional PowerSnap Base, the entire power head simply snaps off for safe storage. When there is a call for hurricane, flood or winterization preparation, the easy-to-lift head snaps right out.

Be the first to be back in business with PowerSnap.

Our marina has been through three hurricanes. Thanks to the PowerSnap Base we were able to remove our pedestals from their bases and save them from being damaged. We also really like being able to change power from slip to slip by just snapping in a different panel.

— Brian W., Sportsman Marina
Orange Beach, Alabama

POWERPORT®

Unrivalled Versatility. Featuring the PowerSnap® Panel

HyPower's design and engineering has always been about ease of use for our customers, no matter their needs. The PowerPort is the result of this philosophy. It stands above all others with four functional built-in sides for added flexibility and convenience. With the PowerPort's factory-wired modular design and 400 ampere capacity, it is certain to keep you a step ahead of your ever-changing electrical needs.

Lighting

Minimize safety and security risks with downward indirect lighting that creates desirable visual interest. The 360° lighting module comes standard with energy efficient 13 watt self-ballasted fluorescent lighting.

The Power You Need

No matter your boat, RV, home or work needs, HyPower has a solution. Customize your power up to 400 amperes.

Flexibility

It's not just receptacles and breakers. Add to your experience with high-speed internet or cable connections.

Space Efficient

Your space is premium. The space efficient PowerPort takes up less than one square foot of your valuable space.

Personalize

Create an identity by choosing your personal cap color of green, blue or white. Custom logo imprint is available to create a look all your own.

Water Access

Water spigots are located 15" above the deck for convenient, ADA compliant, use.

Durability

Standing strong, the PowerPort is impact resistant and flame-retardant. Adding to the value, the durable enclosure is a special coated, non-conductive polycarbonate which is UV protected.

Versatility

Ensures easy preparation for hurricane, flood or winterization with the optional, patented, PowerSnap Base offering the ability to lift off the power head.

Safety & Security

360° internal mounting system, improves appearance and simplifies installation. No more broken tabs!

2008 was a devastating year for Galveston Island hurricane Ike hit with a storm surge equal to a category 4 hurricane. We just opened "Jamaica Beach RV Park" the year before the storm. Thanks to the wise decision to use Power Port pedestals we were able to detach the pedestal and store them out of harms way. Just days after the storm we reopened and were totally full when all the other RV parks were closed. We are currently adding 58 new sites and again will be using PowerPort pedestals.

— Ron G., Jamaica Beach RV Park, Galveston Island, Texas

ENERGYMATE®

Small in Size. Big in Features.

The power you need, where you need it.

The **EnergyMate** is your simple and economical solution. It's size is ideal for almost any location and it can really deliver the power with a capacity of 120 amperes right where you need it. Just like it's big brother PowerPort, the EnergyMate is built to last, featuring extra durable, non-conductive polycarbonate UL Approved housing. All this and the one-of-a-kind PowerSnap Panel. Now that's big!

- Personalize your PowerSnap panel with combinations up to 50 ampere receptacle and breaker options.
- Put your power where you need it. Mount the EnergyMate on a pole (bracket available), a stand, or create a utility center with our patented HydroLocker.

Featuring the PowerSnap® Panel

LIGHTING | Minimize your safety and security risks with the downward indirect lighting. Standard with energy efficient four watt self-ballasted fluorescent light, the lighting can be controlled remotely or by an onboard photo sensor.

PERSONALIZATION | Customized logo option allows you to personalize each EnergyMate™ with your facilities' identity.

SAFETY & DURABILITY | The durable enclosure is a special, non-metallic, non-conductive, UV protected and UL Approved polycarbonate.

THE POWER YOU NEED | Just like the PowerPort, the EnergyMate's PowerSnap panel is available in combinations of up to 50 ampere corrosion-resistant receptacles (UL approved up to 120 amperes). Choose from Marine, RV and International styles. Receptacles breakers, high-speed internet and TV connections are securely tucked away in lockable cabinet panels.

I want to let you know how pleased I am with the HyPower EnergyMate power panel. It has been under water during two hurricanes and one Nor'easter. When the storms passed, everything came apart easily to clean and reassemble. Even all of my breakers worked! The HyPower advantage is everything plugs into the base where all the permanent wiring is located. This makes it possible to simply pull out the panel and remove it from harm's way - which we have yet to do, but it keeps on ticking. My next door neighbor bought the same unit for his dock on my recommendation and it too weathered Irene without problems. Even his 4 watt night light works. Mine, unfortunately passed away.

— Phil R., Very Satisfied Customer
