

THE POWER PEDESTAL COMPANY

Make every season manageable.

# POWERSNAP<sup>®</sup>

## Hurricane Weather Base

Hurricanes  
Flooding  
Winterization  
End of Season

## Protect your investment with HyPower's patented PowerSnap<sup>®</sup> Hurricane Weather Base.

No other power pedestal has the ability to **disconnect the power head in as little as five minutes**. The innovative modular design of the PowerPort with the optional PowerSnap Weather Base allows you to remove the small wire components located in the power head to safety, and then be back in operation far faster than the competition. **PowerSnap makes it fast and easy!**

### BE PREPARED

1. Turn off power to the PowerPort pedestal
2. Remove three screws on the base and lift off the power head
3. Place the supplied Weather Cap on to the base unit to protect the connections
4. Relocate the power head to safety

THE HYPOWER<sup>®</sup> ADVANTAGE

[powerpedestal.com](http://powerpedestal.com)

THE POWER PEDESTAL COMPANY

## The Value Choice VS. Traditional Pedestals

### FLEXIBILITY

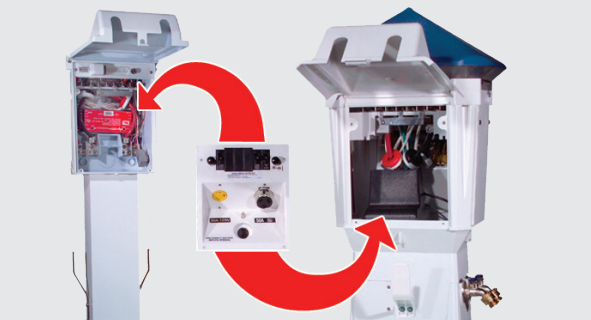

Receptacles and Breakers are on a quick service panel that snaps in and out making it easier to upgrade and service.

### DURABILITY

Built to handle tough environments for a longer life with fewer repairs.

### DESIGN

Safer and easier to use on-site, most electrical parts are standard and can be resupplied locally to reduce cost of ownership.

## PowerSnap® Technology

## DISASTER PREPAREDNESS

*Be the first back in  
business with HyPower's  
PowerSnap technology*

**PowerSnap Weather  
Base allows you to be  
ready in under 5 minutes  
for severe weather**

Protect your investment with our patented PowerSnap® Weather Base. Easy to lift. Easy to remove. Ready to use. When there is a call for hurricane, flood or winterization preparation, the easy to lift off power head snaps right off the optional PowerSnap Base for safe storage. After the event, just snap it back together and turn the power on.
